

1 Description

The C220S Series, featuring Coto's smallest high-voltage MOSFET relay package, delivers high-voltage performance in a compact design. Capable of switching up to 1,200V and 120mA with a low ON resistance of 20Ω (typical) and 1,500V input-to-output isolation, the C220S is engineered for applications with critical space constraints and high-density requirements. Its compact design makes it a reliable, space-efficient solution for Automatic Test Equipment (ATE), industrial controls, and measurement & instrumentation systems. For different requirements, please contact your Coto Applications Engineer at www.cototechnology.com for assistance.
